

Zeno's Paradoxes

The goal of the presentation is to discuss Zeno's paradoxes. The following articles are a good starting point.

- http://en.wikipedia.org/wiki/Zeno%27s_paradox

Your presentation should include

- A discussion of what all three paradoxes are.
- A discussion of why they seem to be paradoxes.
- A discussion at least one proposed solution to each of the paradoxes.

In addition your presentation should include at least one of

- A discussion of the history of the paradoxes.
- A second proposed solution to each paradox (with a discussion of the similarity of the two proposed solutions)

You should also feel free to expand on the above in any directions you would like (so long as they are related to the topic). If you have any questions regarding the presentation feel free to e-mail your TA or Dr. Ackerman
