Gottfried Leibniz

The goal of the presentation is to discuss Gottfried Leibniz. Your presentation should include at least

- A discussion of who Leibniz was.

- A discussion of his life.

- At discussion some of the ideas he used including Leibniz Law

- Mention of his most famous mathematical discovery (calculus) and how today everyone uses his notation.

In addition you should include at least one thing not on the above list

At the end of your presentation the class will be asked one of the following questions.

- Where was Leibniz born?

- What were the three most common languages for him to write in?

- What branch of mathematics did he independently discovery with Newton?

A good starting point for your research is

http://en.wikipedia.org/wiki/Gottfried_Leibniz

If you have any questions regarding the presentation feel free to e-mail your TA or Dr. Ackerman
